

Manufacturer of
Textile Printing Blankets for
Flat-Bed and Rotary Screen
Printing Machines

The Company

Half a century ago, when textile mills used imported sanforised & printing blankets, there were no service centres to repair damaged blankets, and the new ones were too expensive. Late Shri Mohammed Bhai R. Maniar, head of a reputed and established rubber vulcanizing workshop, stepped into the market along with his sons, established a new firm called the MANIAR RUBBER INDUSTRIES. Over the years, they have earned an impressive reputation in vulcanizing and repairing all kinds of printing blankets. Many prestigious names in the Textile industry have been, and are still our satisfied clients.

The Manufacturing Unit

50 years of solving variegated problems concerning printing blankets, gave us the necessary experience and the impetus to start the manufacture of MANIAR printing blankets which are at par with the imported blankets and are far more superior to other Indian manufacturers in terms of quality. Pure indigenous technology combined with an imported manufacturing infrastructure, allows our products to be priced at almost 1/5th the rate of imported blankets and at highly competitive prices with our Indian counter parts. The first MANIAR Blanket rolled out of the factory in June, 1986. Since then, we haven't looked back.

Delivered more than
5000 Maniar blankets in
India & Abroad

Rubber Blanket

Length

Any Length as per your requirement.

Width

Maximum width up to 3250 mm (3.25 meters)

Construction

According to type of machine. Normally 7, 8 & 9 ply construction is used.

Composition

Owing to a special process of combining different plies and selection of special fabric in these plies; MANIAR blankets present such dimensional stability that they will track indelicately without deviation or deformation.

Feature

Endless blanket.

Surface

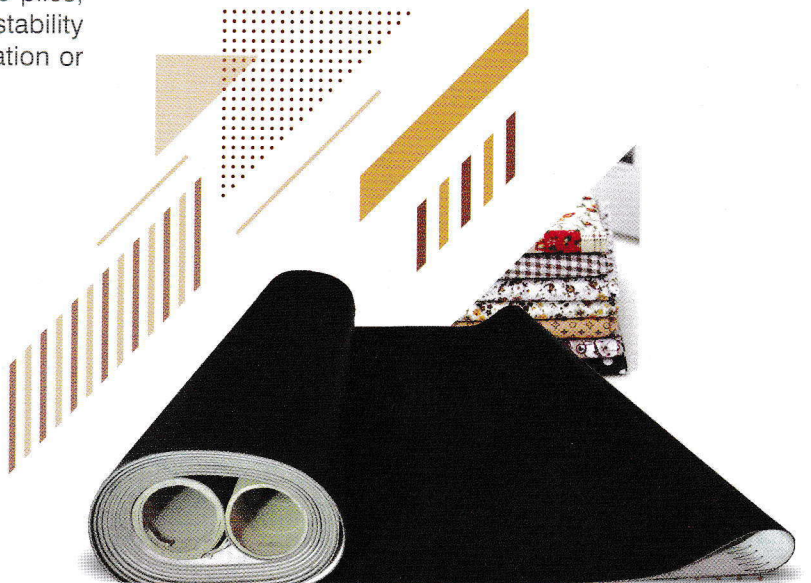

Jet black, absolutely smooth, 100% flat, without any variation of level.

Resistance

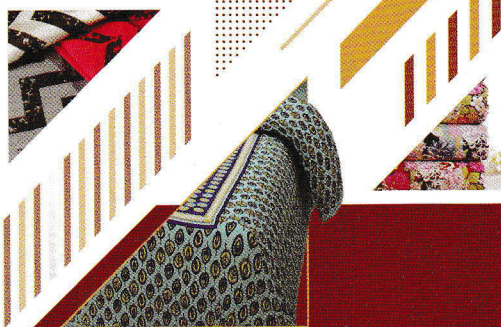

Highly resistant to heat, ageing, oxidation, diluted sulphuric acid, aliphatic hydrocarbons, white spirits with low aromatic contents and mixture of acetone.

Imported PU Blankets

- Suitable for Double Servo M/c. & Rotary M/c.
- Any Length & Any Width Available
- Blankets more than 200' in Length Successfully Running on Flat bed printing Machines
- Technical Specification of Imported Blanket

TOP SURFACE	MATT
UPPER / BOTTOM FABRICS	POLYESTER MONOFIL
THICKNESS	2.2 to 2.8 mm
HARDNESS	TOP COVER 90 SHORE
NO. OF PLY	2 PLY
JOINT METHOD	FINGER SPLICING/ OVER SPLICING

Caution

Keep the blanket away from improper use of Halogen Hydrocarbons, Ketones and Esters which attacks all elastomers; as they will damage the printing blanket.

Service at it's Best

In case of an accident, contact our emergency cell. We maintain a full team of specialised technicians and tool kits at our service centre at Ahmedabad.

Our Emergency Cell is open 24 hours, giving round the clock service at moments notice, thereby saving a considerable amount of revenue of our clients by restricting the close down time of printing machine to a minimum.

Guarantee

A guarantee of three months is offered on Maniar Printing Blankets. The guarantee covers all manufacturing defects in the blanket. MANIAR RUBBER INDUSTRIES will promptly replace the blanket if defective.
